

BREAKING BARRIERS, EMPOWERING DREAMS

Dreams" embodies a new era of proactive engagement and collective responsibility. Rooted in the ethos of youth leadership, Chain for Change stands as a testament to the power of community-driven action. Since its inception in 2017, the organization has championed a bold vision—one where every individual, irrespective of visual ability, can not only dream but soar.

At its heart lies the audacious endeavor to establish a Resource Centre for Accessible Facilities, seamlessly integrated into the fabric of education. This ambitious undertaking seeks to dismantle the barriers that hinder the educational journey of individuals with visual impairments. The staggering statistic from the World Blind Union—that over 90% of published content remains inaccessible—serves as a sobering reminder of the urgency of this mission.

With unwavering support from Expedición Solidaria, Chain For Change has harnessed the power of innovation, acquiring cutting-edge technology such as a 3D printer. The inauguration of the Resource Centre at St. Xavier's College, Kathmandu, marks a pivotal moment in the quest for inclusive education. Concurrently, a specialized course at Universitat Politècnica de València empowers students with the skills of 3D design and printing, laying the foundation for a future where accessibility knows no bounds.

Under the expert tutelage of Ms. Victoria Olcina Marcos, an exchange

student and design instructor, a cadre of passionate individuals embarks on a journey of creativity and collaboration. From mastering intricate software applications to conceptualizing inclusive models, their dedication knows no bounds. They are not merely participants in a project; they are architects of change, embodying the spirit of empowerment in every endeavor.

However, amidst the triumphs lie the challenges—the stark reality of limited resources. As the ink stocks deplete and the printing presses labor tirelessly, the call for support rings louder than ever. It is here, in this crucible of determination and resilience, that the true essence of community emerges. Your contribution is not merely a donation; it is an investment in the future, a testament to the belief that every dream deserves wings.

Upon the project's completion, its impact will reverberate far beyond the confines of St. Xavier's College. From the bustling streets of Kathmandu to the remote corners of Nepal, the ripple effect of inclusivity will touch the lives of countless individuals. The journey does not end with the printing of models; it begins anew—a journey of dissemination, education, and empowerment.

We can all join them as they rewrite the narrative, dismantle barriers, and pave the way for a future where dreams know no bounds. Stay tuned for more updates on Chain for Change's extraordinary work, as they continue to champion the rights and aspirations of individuals with visual disabilities, one dream at a time.

In a world often overshadowed by limitations and boundaries, there emerges a beacon of hope—a transformative initiative known as Project "Wings to Dreams." Led by the dynamic collaboration of CFC (Chain For Change), Expedición Solidaria, Universitat Politècnica de València in Spain, and St. Xavier's College in Kathmandu, this visionary project signifies a paradigm shift in the pursuit of inclusivity and empowerment.

Gone are the days of passive philanthropy; Project "Wings to
